Some Obsolete HTML Tags

Obsolete Tag(s)	Replacement
<acronym>	Use the <abbr> tag.
<applet>	Use the <object> tag.
<basefont>	Use CSS <code>body { font-family: font; }</code> rule.
	Use CSS <code>font-family: font;</code> declaration.
<big>	Use CSS <code>font-size: 1.3em;</code> declaration.
<center>	Use CSS <code>text-align: center;</code> declaration.
<frame>, <frameset>, <noframes>	Use the <iframe> tag and the CSS <code>position: fixed;</code> declaration.
<strike>	Use CSS <code>text-decoration: line-through;</code> declaration.
<u>	Use CSS <code>text-decoration: underline;</code> declaration.

Note:

1. Web developers should no longer use these tags, but web browsers are required to support them for backward compatibility.
2. There are also numerous *obsolete attributes* that are not listed here for brevity.
